SUMMARY

final year Computer Science and Engineering (Artificial Intelligence & Machine Learning) student with strong programming skills in Java, Python, and C++, along with a solid foundation in Data Structures, Algorithms, Object-Oriented Programming, and Software Development. Hands-on experience building full-stack web applications, REST APIs, and database-driven systems through academic projects and internships. Served as Vice President of the IEEE Computational Intelligence Society (IEEE CIS), demonstrating leadership, teamwork, and problem-solving abilities. Passionate about Software Development, Cloud Computing, AI/ML, and emerging technologies, with a strong desire to build scalable and impactful solutions.

EDUCATION

BE in Computer Science (Artificial Intelligence & Machine Learning), <i>Vidyavardhaka College of Engineering CGPA :8.36</i>	2027
PUC (PCMB), <i>STG PU college 91.6%</i>	2023
10th (STATE), <i>ADARSHA Vidhyalaya 96.32%</i>	2021

SKILLS

Programming Languages: Python | Java | C++

AI/ML: TensorFlow | Scikit-learn | OpenCV

Web Technologies: HTML5 | CSS3 | React.js | Rest APIs | Node.js | Express.js

Software Development: Data Structures | Basic Algorithm | DBMS | Software Design Principles | Debugging | SDLC

Cloud & Databases: AWS | CI/CD | Docker | Mysql | MongoDB | PostgreSQL

Tools: Git | GitHub | Postman | Vs Code

Soft Skills: Effective communication and presentation skills | Team collaboration and leadership

CERTIFICATIONS

• Introduction to Python	• Saviynt Certified Jan 2026	Participated in Hackabhigin – National Level 24- Hour Hackathon	• IBM SkillsBuild Project- Based Learning Program – CSRBOX
• GCP - Cloud Foundations	• Arduino Bootcamp: Learning Through Projects- Coursera		

EXPERIENCE

Volunteer

- Volunteered in college-level hackathons and national-level
- Assisted in event coordination, team management, and execution of technical activities.

IBM skillsBuild | CSRBOX(virtual internship 4 WEEKS)

- Developed responsive web application components using modern web technologies
- Collaborated with team members to debug, test, and optimize software features.
- Integrated REST APIs and backend services to improve application functionality application functionality and user experience.

Agentic AI Workshop

- Training on autonomous AI agents, decision-making, and workflow automation

PROJECTS

Inventory Management System (MERN Stack):

- Designed a full-stack web application to track products, stock movements, and generate reports.
- Implemented JWT authentication, role-based access control, analytics dashboard, and PDF/Excel export features for efficient business operations

Real-Time Face Expression Detection System:

- Designed a real-time web application using OpenCV, TensorFlow, and Flask to detect and classify human facial emotions from live camera input
- Deployed the model using Gunicorn for production-ready performance

Digital Fuel Indicator System using Arduino:

- Designed a microcontroller-based digital fuel monitoring system using Arduino Uno and ultrasonic sensor to measure fuel levels accurately and trigger low-fuel alerts using buzzer and LEDs.

ACHIEVEMENTS & ACTIVITIES

- NPTEL – Smart Cities | **Elite + Gold** | 91% Successfully completed a 12-week IIT-certified NPTEL course
- **1st Runner -up** of pathcraft-the gen ai webpage architect challenge
- Successfully organized a **Data-thon event**, facilitating dataset sharing, participant coordination, and technical support to ensure smooth execution of data-driven challenge
